

Your Mission Requires a Partner Built for Iraq's Complexities

Diri Al-Nassir for Security & Support Services is an Iraqi-registered company delivering professional, reliable, and compliant security solutions. Our approach combines deep local expertise with exacting international standards, ensuring your operations are not just protected, but enabled to succeed.

The Foundation of Our Partnership

International Compliance

Fully aligned with ISO 18788 Security Operations Management System principles and international best practices.

Local Expertise, Global Standards

Deep understanding of the local operational environment combined with the structure and accountability of international security protocols.

Strategic Partnership with MAG

A formal Joint Venture integrating capabilities, resources, and expertise to manage complex projects throughout Iraq.

Proven Track Record

Extensive experience delivering for international organizations, government entities, and private sector clients across Iraq's diverse regions.

Integrated Solutions for Mission Success

We provide a comprehensive suite of security and risk management services tailored to protect your assets, people, and reputation. Our capabilities are structured to provide end-to-end operational support.

Static & Compound Security

Securing your facilities with robust, compliant, and continuously monitored protection.

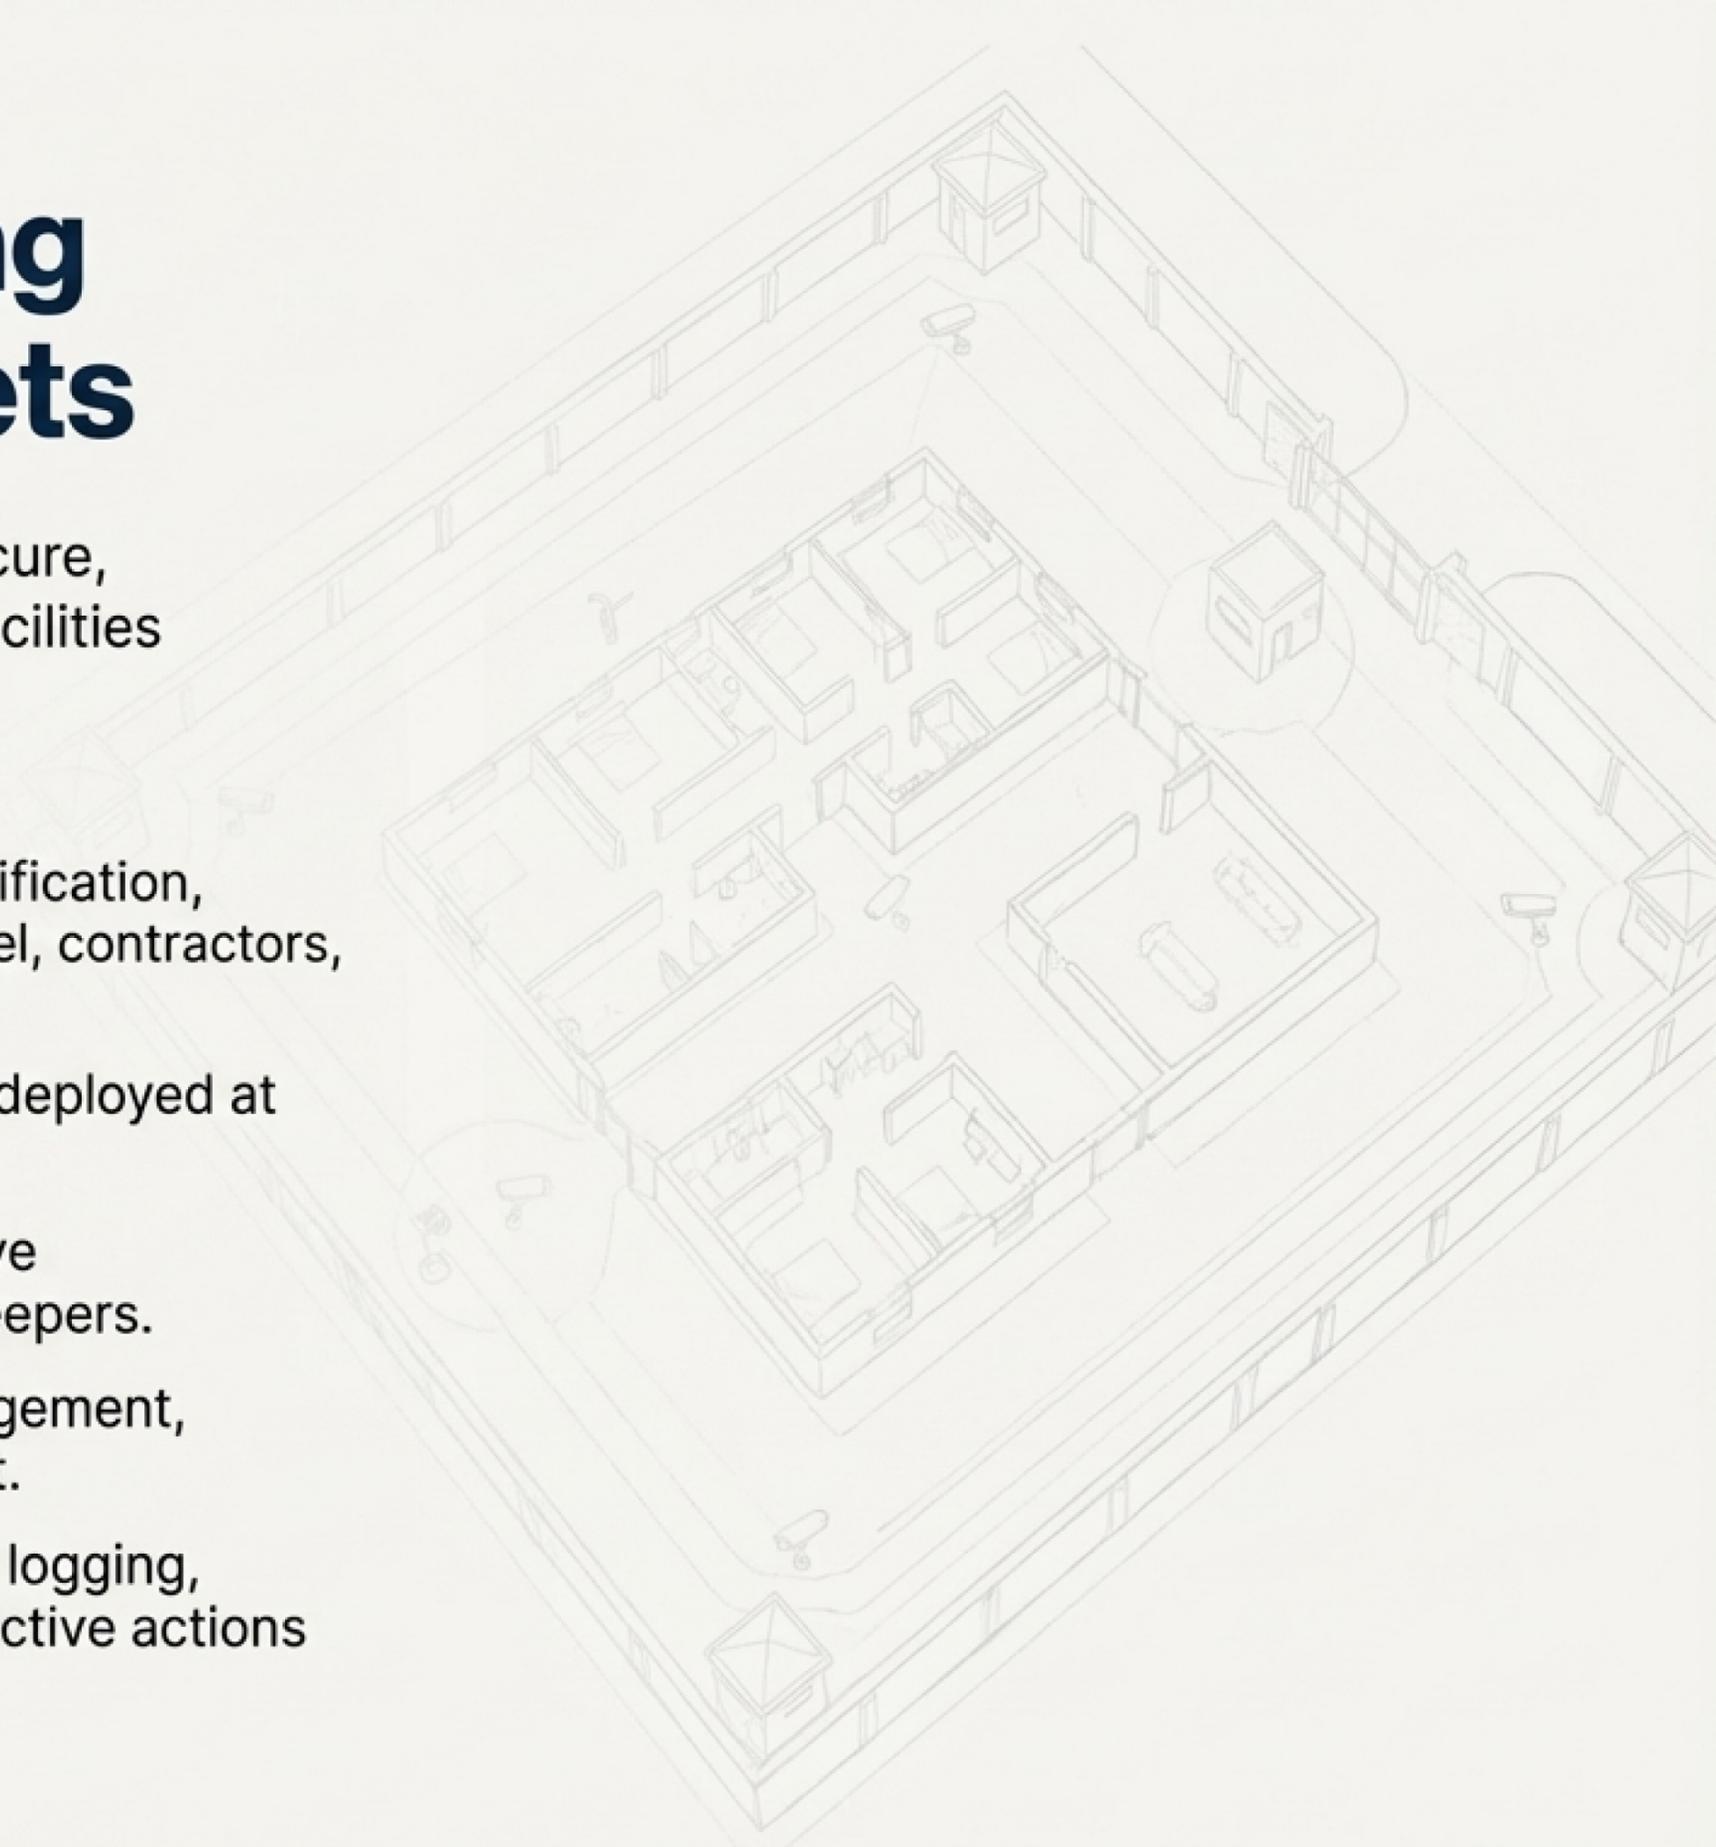

Mobile & Protective Security

Ensuring the safe movement of your personnel through high-risk environments.

Static Security: Securing Your Foundational Assets

Our static security services are designed to create a secure, controlled, and resilient working environment for your facilities and personnel.

- **Access Control & Visitor Management:** Full identity verification, badge issuance, and controlled movement of all personnel, contractors, and visitors.
- **Guard Force Deployment:** Professional, trained guards deployed at strategic posts with continuous supervision.
- **CCTV & Control Room Operations:** 24/7 surveillance, live monitoring, and real-time escalation by trained watchkeepers.
- **Compound Protection:** Perimeter patrolling, gate management, enforcement of compound rules, and fire safety support.
- **Incident Management & Reporting:** Structured incident logging, escalation, root-cause analysis, and post-incident corrective actions in line with ISO 18788.

Mobile Security: Protecting Your People in Motion

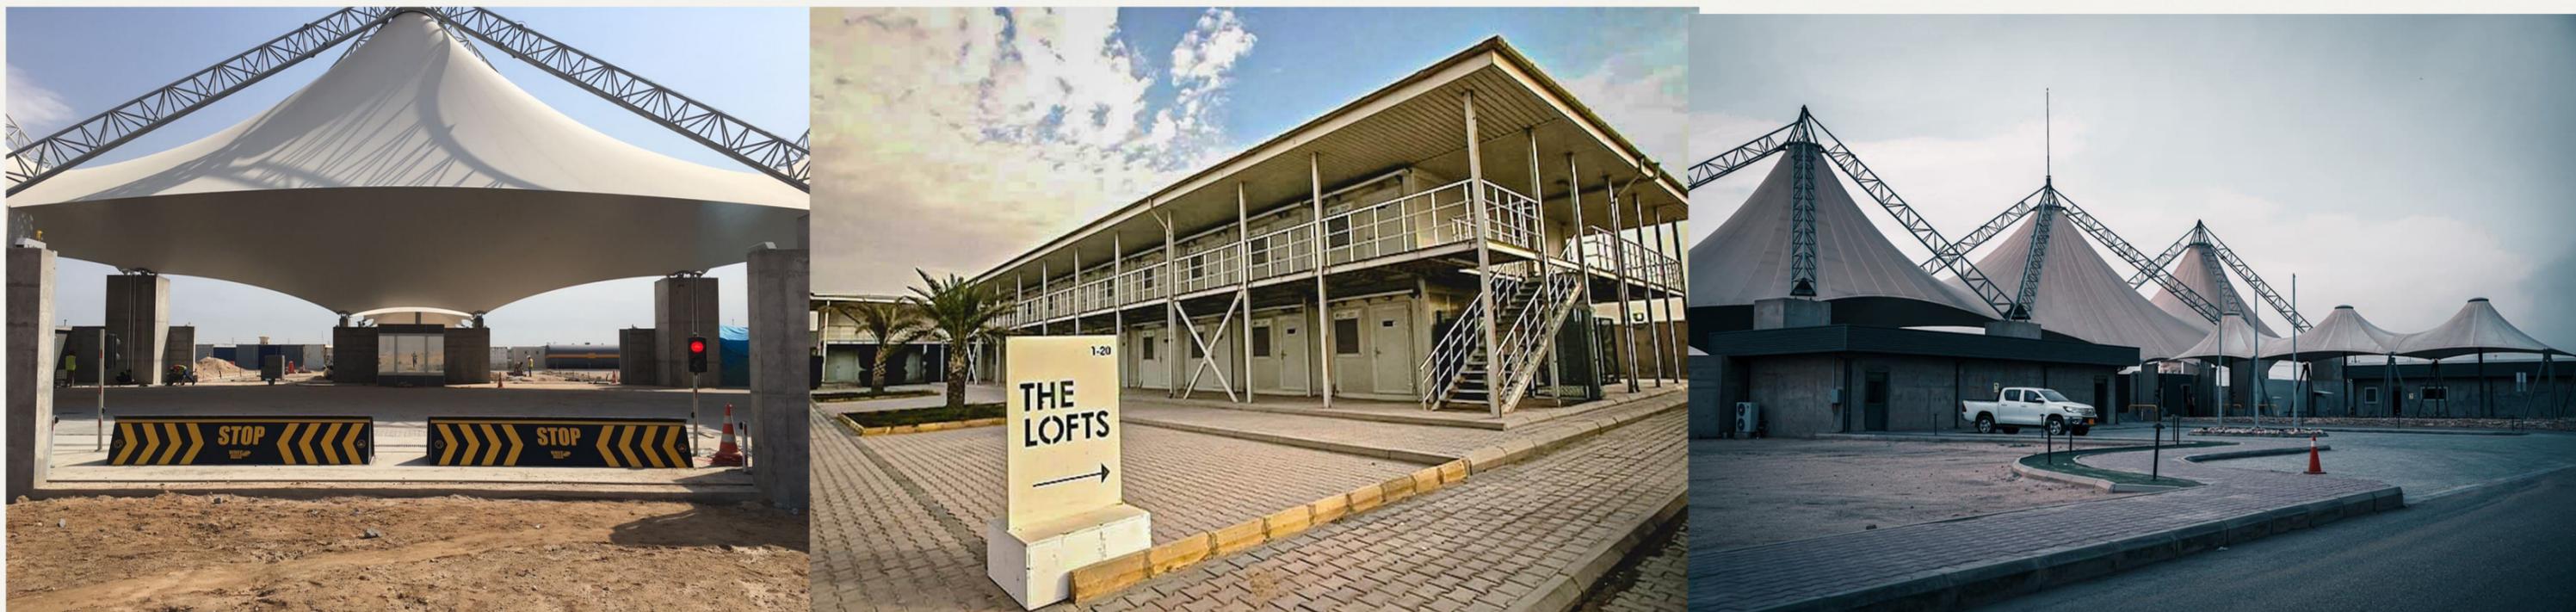

Our Protective Security Detail (PSD) teams provide expert protection for client movements in high-risk environments across Mosul, Kirkuk, and Basra.

- **Armored Transport:** Movement security utilizing a fleet of professionally maintained B6 armored vehicles.
- **Route Assessment & Planning:** Daily risk briefings and detailed assessments of primary and alternative routes.
- **Convoy Coordination:** Professional convoy management with secure radio communications.
- **Personnel Protection:** Close protection for international and local staff during critical field missions.
- **Emergency & Extraction Planning:** Comprehensive emergency response readiness and extraction plans for all movements.

Proven Performance in Practice

Our reputation is built on successful execution. The following case studies demonstrate our ability to deliver reliable, high-standard security solutions that directly align with the complex needs of our clients in Iraq.

“A reputation as a trusted security provider in Iraq.”

Case Study: Ensuring a Secure Environment at Iraq Energy City (IEC)

Client

Iraqi Energy City

Location

Alburgsea, Basra, Iraq

The Mission

To provide comprehensive, integrated static security for a complex, multi-tenant energy hub hosting diverse international and local organizations.

The Challenge

Managing access, monitoring, and response for a high-value facility with multiple stakeholders, each with unique security requirements, under a single secured perimeter.

An Integrated Solution for a Complex Facility

Diri Al-Nassir deployed a multi-layered security program to meet IEC's operational needs.

Full Access Control & ID Verification System

Visitor Management & Movement Coordination

Guard Deployment & Supervision at Strategic Posts

HIGH

**Client Satisfaction
& Strengthened
Compliance**

Our structured approach ensured a safe and controlled environment, strengthening security procedures and ensuring full compliance for all tenants within the IEC compound.

Case Study: Protecting People in High-Risk Environments

Client: TAS Energy Company

Location: Mosul, Kirkuk, and Basra (oil fields)

The Mission: To provide close protection and secure movement for international and local staff conducting field missions in high-risk and sensitive locations.

The Challenge: Navigating varying threat levels and ensuring the safety of personnel during critical operational movements across multiple high-risk zones.

The Result: Enabling Critical Field Operations

Through meticulous planning, professional execution, and constant vigilance, we enabled TAS Energy to conduct their essential field operations with confidence and security.

Safe and Incident-Free Missions

Successful completion of all protected movements without security incidents.

Full Support to Client Operations

Ensured uninterrupted field operations, allowing the client to meet their business objectives.

Our experience across Iraq's diverse threat environments demonstrates our ability to maintain safety and meet the service expectations of our clients.

The Diri Al-Nassir Commitment

Our success is built on a foundation of operational excellence and a transparent partnership with our clients.

Professionalism

Adherence to the highest international standards in every aspect of our operations.

Transparency

Strong communication channels with clients, including daily, weekly, and monthly reporting.

Accountability

Continuous supervision of field operations to guarantee service quality and immediate response.

Risk Mitigation

A proactive approach to identifying and mitigating risks, ensuring a secure working environment.
